 Tirur, Kerala, India

Professional Summary

Computer Science & Design undergraduate (CGPA 8.17) who ships production-grade, full-stack and AI-powered web applications end to end. Comfortable owning a feature from database schema to deployed UI using Next.js, React, TypeScript, and LLM APIs, with hands-on experience in automated testing and quality assurance on real client software. Seeking software engineering roles where I can build reliable, user-facing products at scale.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C, SQL, PHP

Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Server Actions

Databases: PostgreSQL, Firebase/Firestore, MongoDB, MySQL

Tools & Platforms: Git, GitHub, Bitbucket, Prisma ORM, Clerk Auth, Vercel, Robot Framework

AI / ML: OpenAI API Integration, Prompt Engineering, LLM Evaluation, Resume Parsing

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, SDLC

Experience

Software Development Intern — Nethram LLC

May 2026 – Jun 2026

- Built and maintained **[N]+ automated test cases** with Robot Framework for a production web application delivered to Homewav LLC, expanding regression coverage of critical user flows.
- Partnered with developers to reproduce, isolate, and verify fixes for software defects, reducing release regressions and improving overall release quality.
- Integrated testing into the team's QA workflow using Git and Bitbucket, following modern branching and code-review practices.

Featured Projects

CareerForge AI

[Live](#) | [GitHub](#)

Next.js 16 • React 19 • TypeScript • Prisma • PostgreSQL • Clerk • OpenAI API

- Architected an AI career platform that parses resumes, runs personalized LLM-driven mock interviews, scores responses, and surfaces interview readiness on an interactive dashboard.
- Engineered the full backend with Prisma, PostgreSQL, and Clerk authentication to model resumes, interviews, evaluations, and job recommendations behind secure, type-safe APIs.
- Implemented automated PDF/DOCX resume parsing and a multi-source job aggregation pipeline with resume-based matching to rank relevant openings.

Verdana

[Live](#) | [GitHub](#)

Next.js 15 • React 19 • TypeScript • Firebase/Firestore • Clerk • Tailwind CSS

- Built a full-stack social platform that gamifies climate action through eco-scores, achievements, leaderboards, and personalized sustainability tracking.
- Designed an interactive 3D “Living Earth” that visually evolves as users log eco-activities, driving engagement through real-time visual feedback.
- Shipped authentication, user profiles, badges, an admin dashboard, moderation tools, and challenge management on Firestore with Clerk, plus role-based access via Firestore security rules.

Missing Child Finder

[Live](#) | [GitHub](#)

React • Node.js • Express.js • MongoDB

- Developed a centralized platform for reporting and searching missing-children cases with filterable listings and a responsive interface.
- Built RESTful Express services and a MongoDB data layer to manage case records with efficient search and CRUD operations.
- Structured the architecture to support planned AI-powered image matching and intelligent search.

Hostel Mart

[Live](#) | [GitHub](#)

React • Node.js • Express.js • MongoDB (MERN)

- Developed a student marketplace for hostel discovery and exchange of daily-use items through a single web platform.
- Implemented secure CRUD APIs and responsive interfaces, with reusable React components to improve maintainability and scalability.

Education

Government Engineering College Kozhikode

2023 – 2027

B.Tech in Computer Science and Design — APJ Abdul Kalam Technological University (KTU)

CGPA: **8.17 / 10**

Certifications

- Full Stack Development (MERN) Internship — ICT Academy of Kerala, UL CyberPark (**Grade A**)
- Artificial Intelligence & Machine Learning Internship — ICT Academy of Kerala, UL CyberPark
